Navi Mumbai, Maharashtra | +91 9867332766 | csarthak013@gmail.com | [linkedin.com/in/csarthak013](https://www.linkedin.com/in/csarthak013) | github.com/csarthak013

Professional Summary

Final-year Computer Engineering student with hands-on experience building full-stack applications, backend systems and machine learning solutions through projects and an internship. Strong foundation in REST API development, Data Structures & Algorithms, DBMS and Operating Systems.

Technical Skills

- **Languages:** Java, Python, JavaScript, SQL, HTML, CSS
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, Django, Flask, Tailwind CSS
- **Databases:** PostgreSQL, MongoDB
- **Tools:** Git, GitHub, Postman, VS Code
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Machine Learning

Education

Vidyalankar Institute of Technology <i>B.Tech in Computer Engineering (CGPA: 9.55 / 10.0)</i>	Navi Mumbai, Maharashtra 2023 – 2027
Mahatma School of Academics and Sports, Junior College <i>HSC - Higher Secondary Certificate (Score: 81.67%)</i>	Navi Mumbai, Maharashtra 2021 – 2023
Mahatma School of Academics and Sports <i>SSC - Secondary School Certificate (Score: 94.2%)</i>	Navi Mumbai, Maharashtra 2021

Experience

Navanta Exim <i>Full Stack Developer Intern</i>	Navi Mumbai, Maharashtra June 2024 – August 2024
• Engineered a workflow-based export platform using Next.js, HTML, Tailwind CSS and TypeScript with a responsive UI. • Integrated frontend components with existing REST APIs, implemented validation logic and contributed to improving export workflow reliability. • Integrated AI-assisted content generation with manual review workflows to compile, verify and export modular compliance documentation.	

Projects

CineSense – Semantic Anime Recommendation System <i>TMDB API, Jikan API</i>	<i>Python, Flask, Sentence Transformers, Scikit-learn,</i>
• Built a semantic anime recommendation system leveraging Sentence Transformer embeddings enriched with TMDB and Jikan metadata. • Implemented KMeans clustering, franchise-aware filtering and content-type deduplication to improve recommendation quality. • Architected a Flask REST API to serve recommendations and generated interactive 3D t-SNE visualizations for exploring semantic clusters.	
TrainWise – AI Workout Recommendation Platform <i>Learnings</i>	<i>React, Node.js, Express.js, MongoDB, Python, Machine Learning</i>
• Architected a full-stack system integrating an ML recommendation engine to generate personalized workout regimens. • Implemented JWT session authentication and optimized MongoDB aggregation pipelines for real-time progress analytics. • Designed and deployed a Node.js/Express.js REST API for transactional workout tracking and history logging.	
Adaptive Multi-User Study Planner	<i>Node.js, Express.js, PostgreSQL</i>
• Architected a scalable backend featuring role-based access control (RBAC) and schemas for schedule cloning. • Optimized PostgreSQL relational database schemas, indexing and query structures to minimize concurrent latency. • Developed a priority-based scheduling algorithm driven by task weights, deadlines and dynamic workloads.	

Certifications

- NPTEL Certified in Programming in Java

Coding Profiles

- **LeetCode:** Solved 70+ algorithmic challenges (focused on Arrays, Strings, Trees and Dynamic Programming), demonstrating strong problem-solving skills and expertise in Data Structures & Algorithms.

Additional Information

- **Hackathons:** Smart India Hackathon (SIH) Participant
- **Community Service:** National Service Scheme (NSS) Volunteer
- **Interests:** Backend Development, Scalable Systems and AI-powered Software Engineering
