

Sarthak Chaudhari

Navi Mumbai, Maharashtra | +91 9867332766 | csarthak013@gmail.com | linkedin.com/sarthak-chaudhari | github.com/Sarthak0205

Professional Summary

Computer Engineering undergraduate with hands-on experience in full-stack software development and AI-powered applications. Skilled in designing scalable backend systems, secure RESTful APIs and integrating machine learning solutions using Java, Python, Node.js, React, and PostgreSQL. Strong foundation in Data Structures & Algorithms, DBMS, Operating Systems and Object-Oriented Programming.

Technical Skills

- **Languages & Databases:** Java, Python, JavaScript, SQL, PostgreSQL, MongoDB.
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Django, HTML, CSS, Tailwind CSS
- **Backend & Security:** REST APIs, JWT Authentication, API Routing, System Design
- **Tools & Platforms:** Git, GitHub, Postman, VS Code
- **Core CS:** Data Structures & Algorithms, DBMS, OOP (Object-Oriented Programming), Operating Systems, Machine Learning

Education

Vidyalankar Institute of Technology	Mumbai, Maharashtra
<i>B.Tech in Computer Engineering (CGPA: 9.55 / 10.0)</i>	2023 – 2027
Mahatma School of Academics and Sports, Junior College	Navi Mumbai, Maharashtra
<i>HSC - Higher Secondary Certificate (Score: 81.67%)</i>	2021 – 2023
Mahatma School of Academics and Sports	Navi Mumbai, Maharashtra
<i>SSC - Secondary School Certificate (Score: 94.20%)</i>	2021

Experience

Navanta Exim	Navi Mumbai, Maharashtra
<i>Full Stack Developer Intern</i>	December 2025 – March 2026
• Designed and engineered an automated export product management system, reducing processing latency. • Developed robust backend integrations and validation schemas to ensure data integrity and REST API security. • Optimized React component rendering and state management to enhance application responsiveness.	

Projects

TrainWise - AI Workout Recommendation Platform	<i>React, Node.js, Express.js, MongoDB, Python, ML</i>
• Architected a full-stack platform featuring a personalized ML workout recommendation engine. • Implemented secure JWT authentication and optimized MongoDB aggregations for real-time progress analytics. • Designed and deployed a high-performance RESTful API to manage workout tracking and history logging.	
Adaptive Multi-User Study Planner	<i>Node.js, Express.js, PostgreSQL</i>
• Designed a scalable, multi-user backend architecture featuring role-based access control and schedule cloning. • Optimized relational schemas and query structures in PostgreSQL to minimize response times under concurrent loads. • Developed a priority-based task scheduling algorithm driven by user deadlines and workload metrics.	
CineSense - Hybrid Media Recommendation System	<i>Python, Machine Learning, Django</i>
• Engineered a hybrid recommendation engine using collaborative filtering, content embeddings and clustering. • Designed robust data pipelines to process unstructured metadata from external APIs for personalized suggestions. • Built an interactive visualization system to explore content similarity vectors and user interest profiles.	

Coding Profiles

- **LeetCode:** Solved 50+ Problems (focused on Arrays, Strings, Stacks and Trees), demonstrating strong problem-solving skills and strengthening problem-solving skills across Arrays, Strings, Linked Lists, Trees, Hashing and Binary Search.

Additional Information

- **Hackathons:** Smart India Hackathon (SIH) Participant
- **Community Service:** National Service Scheme (NSS) Volunteer
- **Interests:** Passionate about Backend Development, Scalable Systems and AI-powered Software Engineering
